Patent Search Patents 1 - 7 of 7 on state variable circuit diagram values "machine control system". (0.00 seconds)

Did you mean: state variable circuit diagram sales "machine control system"

Fail-safe machine control system

US Pat. 4484119 - Filed Jun 28, 1983 - AT&T Technologies, Inc.

For example, assume that initially JK flip-flop 80A is in "0" state and JK flip-flop 81A is in ... The logic diagram for NOR circuit 85 is shown by FIG. 6. ...

Looper control system for a rolling mill

US Pat. 5718138 - Filed Nov 24, 1995 - Kabushiki Kaisha Toshiba

6 is a detailed block diagram showing the constructed process model obtained by modeling a multi-variable function of the first embodiment of the looper ...

HYBRID MACHINE CONTROL SYSTEM

US Pat. 3483362 - Filed Jan 6, 1967

The programming of new nominal values for purposes of extending the ... 12 consists, in the simplest case, of a subtraction circuit of the type described 60 ...

Dampening control method taking account of a plurality of variables that influence the printing process

US Pat. 6655272 - Filed Nov 26, 2001 - Heidelberger Druckmaschinen AG

The manipulated variable Y is therefore the quantity of dampening solution which is used as an input for the controlled section 7, that is to say the state ...

Phase detector control for a servo system

US Pat. 4595868 - Filed Feb 27, 1985 - Ampex Corporation

occur, at which time the free-wheeling one-shot changes state to enable the ... and which is a part of the operator controlled 15 machine control system. ...

Process and device for spraying a coating product

US Pat. 5744190 - Filed Nov 17, 1995 - Sames S.A.

... sensor 10 to the machine control system for each centimeter of displacement ... variable toe coating product onto articles transported by a conveyor, ...

Laundering apparatus, method of operating a laundry machine, control system for an electronically commutated motor and method of operating an electronically commutated motor

US Pat. 4532459 - Filed Jul 21, 1982 - General Electric Company

In the energy dissipation circuit 228, transistor 250 is normally maintained in a conductive state by the application of a suitable signal to its base from ...
